RESEARCH INTERESTS

Generative AI; Large Language Models; Software Engineering

EDUCATION

B.Sc. in Computer Science and Engineering

Apr 2018 – Jan 2023

Ahsanullah University of Science and Technology (AUST), Dhaka, Bangladesh

CGPA: 3.814/4.00 (Class Rank: 6/123)

Dean's Award for Academic Excellence

Last 2 Years CGPA: 3.942

WORK EXPERIENCE

Senior Software Engineer – Enosis Solutions, Dhaka, Bangladesh

Feb 2025 – Present

Production-level C++ and C# development on an enterprise accounting platform(Desktop Application) used by many of businesses across North America.

- Optimized complex legacy procedural code by converting it into efficient SQL queries, improving performance on large-scale financial datasets and achieving 10–25% execution speed gains.
- Contributed to multi-service microservices architecture using ASP.NET Core, .NET 8, WinForms, MFC.
- Actively performed code reviews, enforcing clean code principles and best practices to improve overall code quality.
- Applied LLM-based agentic tools (GitHub Copilot, Claude Code) in production workflows. Leveraged AI-assisted development tools to accelerate development, debugging and improve code consistency.
- Collaborated closely with cross-functional and cross-team engineers, product stakeholders, and QA to clarify requirements and deliver aligned, production-ready solutions

Software Engineer – Enosis Solutions, Dhaka, Bangladesh

Feb 2023 – Jan 2025

Full-stack development of an outsourcing platform(Web Application) which offers dynamic search, company profiles, and expert matchmaking to help clients find the right tech partner.

- Built a platform from scratch using ASP.NET Core 8, React, Next.js, and PostgreSQL – covering backend APIs, frontend UI, database architecture, and deployment.
- Designed and implemented core modules including company profiles, services, technologies, locations, reviews, ratings, and user account management.
- Implemented robust CRUD flows, data validation using FluentValidation, and repository patterns with Entity Framework Core (Npgsql).

ACADEMIC PROJECTS

Universe of Battle ([Github Link](#)) | ([Youtube Link](#))

- Multiplayer fighting game demonstrating low-level systems programming real-time game logic.
- Language: C/C++

Admission Hub ([Github Link](#)) | ([Youtube Link](#))

- Android information app for university admission for student use.
- Tool: Android Studio

Covid19 Helpline ([Github Link](#))

- Database-driven COVID-19 information system using Java Swing, MSSQL, and NetBeans IDE.

OTHER EXPERIENCE

- Organizer and Problem Setter – Multiple Intra AUST Programming Contests
- Instructor – Competitive Programming training sessions for junior students
- Coordinated technical workshops, programming contests, and cultural events as a student organizer (4th year)
